

Conga

Truncated cone-shaped bin composed of a laser-cut structure with plant motifs in powder coated sendzimir steel sheet, equipped with a lid with a central hole, galvanised and powder coated in steel sheet, which can be opened with a snap lock. The bin is equipped with Sendzimir steel sheet inner liner.

Variant code: 0021464

Size and weight: Height 680mm
Weight 16kg
Diameter 400mm
Capacity 30lt

Materials: Steel treated with protective coating and powder coating

Finishes: Polyester powder coated steel in wrinkled finish

Polyester powder coated aluminum in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Finishes:

Fixing: Freestanding or pre-drilled for anchors

Technical drawing:

Ground fixings

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

RAL

SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.
