

C3

Litter bin consisting of a cylindrical structure H=490 mm and a sheet metal moulded bottom, and pressed sheet metal bag holder cover. The bins can be installed with special spacers or placed side by side to create islands for separate waste collection. For indoor use only.

Variant code: 0025334

Size and weight: Height 500mm
Weight 7kg
Diameter 330mm
Capacity 25lt

Materials: Steel treated with protective coating and powder coating

Finishes: Polyester powder coated steel in smooth finish

Color:
to be chosen from Metalco standard colour range

Fixing: Freestanding (indoor only)

Technical drawing:

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

RAL

SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.
