

Bike

Modular bike rack - composition module - in powder coated steel with curved tube wheel support, fixed on a proper frame.

Variant code: 0030144

Size and weight: Width 1016mm
Length 510mm
Height 298mm
Weight 17kg

Materials: Steel treated with protective coating and powder coating

Finishes: Polyester powder coated steel in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Fixing: Installation with threaded bars

Accessories: Kit fissaggio con tirafondo

Technical drawing:

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.
