

Air Port

This collection of modular benches is designed to offer maximum compositional flexibility and seamless integration into public spaces. The seat surface, available in steel rods, hardwood, or thermotreated pine, rests on two side supports made of painted cast aluminum, highlighting a balance of clean design and structural strength. Offered in four versions – without backrest, with right half-backrest, or with left half-backrest or for installation – the system allows for customized configurations suited to a variety of environments and uses, combining comfort, style, and design freedom.

Airport A

Modular bench without backrest, consisting of a galvanized and polyester powder-coated seat surface in tubular steel with laser-shaped sheet metal brackets. The arrangement of the tubulars is radiused on the long side to give more safety and comfort to the product and all the tubulars are closed at the ends by PVC caps. The supports, in cast aluminum coated with polyester powders, are mechanically fixed to the central bar.

Variant code: 0071134

Size and weight: Width 750mm
Length 2200mm
Height 410mm
Weight 72kg

Materials: Polyester powder coated aluminum

Steel treated with protective coating and powder coating

Finishes: Polyester powder coated steel in wrinkled finish

Polyester powder coated aluminum in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Fixing: Freestanding with pedestals or Installation with threaded bars

Accessories: Kit fissaggio con tirafondo per panche lineari (4 pz.), Kit fissaggio piedini con tassello per panche lineari (4 pz.), Kit fissaggio piedini con tirafondo per panche lineari (4 pz.), Viteria antifurto (kit panca)

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.
