

# Aero A3

---

Litter bin for separate waste collection consisting of a 30x20mm tubular steel frame and shaped 2 to 5mm thick sheet metal, covered with two 15/10mm thick sheet steel half-mantles. The 6mm-thick aluminium lid opens by means of two gas-powered jacks, which are operated by releasing the snap lock with a triangular key. The litter bin is equipped with 3 openings for the introduction of sorted waste with relative conveyors in 2 mm thick press-bent sheet metal, internal sheet metal containers, external plastic handles for handling and feet for stable ground support. On request, the litter bin can be supplied with customised graphics. For indoor use only. Capacity: 2x50 + 1x65 litres

---

**Variant code:** 0021790

---

**Size and weight:** Width 480mm  
Length 990mm  
Height 805mm  
Weight 60kg

---

**Materials:** Stainless steel  
+  
aluminum

---

**Finishes:** Brushed stainless steel  
+  
Aluminum

Color:  
to be chosen from Metalco standard colour  
range

---

**Fixing:** Freestanding (indoor only)

## POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

### RAL

### SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.

## STAINLESS STEEL

---

For our stainless steel products and components, we normally use AISI 304 or 304L stainless steel, but in case of installation in highly aggressive conditions we recommend requesting AISI 316 stainless steel.

Our stainless steel is usually brushed or shotblasted, depending on the technical features of the product.

Electropolishing treatment is also available, upon request.
