

Cobra

The COBRA collection features linear or modular seating made of exotic wood/larch, designed for high-traffic urban spaces. Created to provide immediate benefits to users, the collection includes base modules such as corner seats, linear, and modular units. A distinctive feature of COBRA is the flexibility in assembly: you can either arrange the modules together for customized layouts or optimize the number of supports for more efficient solutions.

Cobra Ca1

Corner seat module right, without backrest, composed of a top with horizontal strips in heat-treated pine wood, with a supporting structure in galvanized steel profiles and polyester powder coated. The wood remains spaced out, thus avoiding water stagnation, and in a vertical and correct position thanks to the "U" profile in technopolymer. It can be installed in compositions by combining it with the other elements of the collection.

Variant code: 0071360

Size and weight: Width 1093mm
Length 1093mm
Weight 45kg
Seat Height 115mm

Materials: thermotreated pine wood + Steel treated with protective coating and powder coating + technopolymer
