

Partners

2-module shelter, composed of columns in extruded rigatoo aluminum, polyester powder coated, equipped with internal structural reinforcement in steel tube and base plate, with hemispherical upper cap in zamak and base base in polyester powder-coated steel, by a bottom composed of laminated glass panels or perforated steel sheet and by a cover composed of transparent or smoked methacrylate sheets, supported by a system of ribs and counter-ribs in polyester powder-coated aluminum. The columns are connected to each other, in the upper part, both front and rear, by two extruded polyester powder-coated aluminum that drain rainwater inside the columns themselves. It can be completed by side walls in glass or perforated sheet metal, a side and back advertising board, sign signs, methacrylate gables and an LED lighting system.

Variant code: 0101854

Size and weight: Width 2210mm
Length 1730mm
Wheelbase 1040mm

Materials: Polyester powder coated aluminum
+
Steel treated with protective coating and powder coating
+
Layered glass 4+4

Finishes: Polyester powder coated aluminum in wrinkled finish
+
Polyester powder coated steel in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Fixing: Pre-drilled for anchors

Accessories: Panca in acciaio inox (1 per 3 e 4 moduli, 1 o 2 per 5 moduli), Panca verniciata (1 per 3 e 4 moduli, 1 o 2 per 5 moduli), Bacheca informativa formato A3, in alluminio verniciato con 1 anta apribile + parte inferiore in vetro, Bacheca informativa A3, in alluminio anodizzato (da fornire sempre con la parete in lamiera forata), Extra per parete di fondo in lamiera forata verniciata, Tamponamento di fondo in vetro (v. n° moduli) - complemento obbligatorio, Bacheca informativa formato A3, in alluminio verniciato con 1 anta apribile + parte inferiore in lamiera, Extra per copertura in metalcrinato FUME', Ricambio vetro e accessori parete laterale

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

RAL

SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.
