

Arts

A two-module shelter consisting of polyester powder-coated ribbed extruded aluminum columns, featuring internal structural reinforcement in steel tubing and a base plate, with a hemispherical upper cap and polyester powder-coated steel base plate, a base composed of laminated glass panels or perforated steel sheet, and a cantilevered roof. The rear load-bearing columns are connected at the top by a polyester powder-coated aluminum extrusion that serves as a downspout with internal rainwater drainage. The columns feature an upper stainless steel tube connection with stainless steel tubular tie rods to support a structure of polyester powder-coated aluminum ribs and counter-ribs that support the roof composed of clear or smoked methacrylate sheets, connected at the front by a polyester powder-coated aluminum profile. It can be completed with side walls in glass or perforated sheet metal with an aluminium front column (like the rear ones), a back advertising board, sign holders and an LED lighting system housed in the front profile.

Variant code: 0103034

Size and weight: Width 2420mm
Length 1755mm
Height 3144mm
Height under roof 2680mm
Wheelbase 1083mm

Materials: Steel treated with protective coating and powder coating
+
Stainless steel

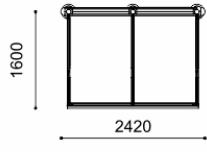

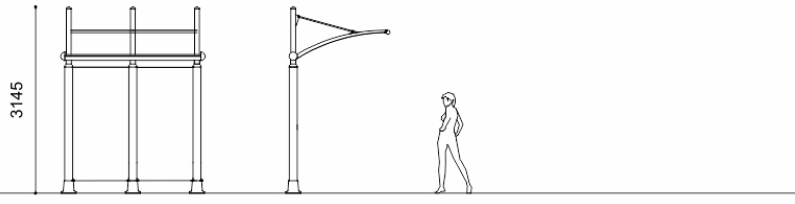

Finishes: Steel treated with protective coating and powder coating
+
Brushed stainless steel

Color:
to be chosen from Metalco standard colour range

Fixing: Plate with anchors

Accessories: Colonna angolo per ARTS senza parete laterale
