

Chandy

Litter bin composed of a truncated-conical structure in powder coated steel, rain cover in cast aluminum equipped with a stainless steel ashtray, which can be opened through lock, and a tube base resting on a semi-spherical cap. The litter bin is equipped with inner liner.

Variant code: 0021904

Size and weight: Height 1010mm
Weight 56kg
Diameter 600mm
Capacity 60lt

Materials: Steel treated with protective coating and powder coating

Polyester powder coated aluminum

Finishes: Polyester powder coated steel in wrinkled finish

Polyester powder coated aluminum in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Fixing: Freestanding or Pre-drilled for anchors

Technical drawing:

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

RAL

SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.
