

Austen

The trapezoidal modular bench without a backrest is an elegant and functional solution for public and urban spaces. Made with a supporting structure in UHPC (Ultra High Performance Concrete), it provides exceptional strength and durability, while the recess at the base ensures stability. The wooden seat, comfortable and refined, adds a touch of warmth to the modern design. This bench can be installed individually or in compositions, combining it with the planter element from the Austen collection to create harmonious and customizable environments, ideal for gardens, squares, and public areas.

WOOD

We use different types of wood for our products, including hardwood, thermotreated pine wood* or Okumè wood.

The hardwood is provided with a water-based pigmented impregnation treatment.

Upon request, hardwood can be left natural/untreated.

Pine wood* undergoes heat treatment, which allows to obtain a material with a longer life cycle, greater resistance to weathering and decay, greater solidity and dimensional stability.

On request, it can be supplied with a water-based pigmented impregnation treatment.

Okumè wood products are always supplied with a water-based varnish.

Thermotreated pine and hardwood can be supplied with FSC certificate on request.

*Thermo-treated pine wood has knots of varying sizes.

UHPC (ULTRA HIGH PERFORMANCE CONCRETE)

Our UHPC (Ultra High Performance Concrete) is available in three different colors, white, grey and dark grey, provided with ALFA-natural smooth finish.

Characterized by textured appearance, UHPC can present not uniform cloudy effects of color and light cracks, which are physiological aspects of this material.

The finished products are treated with a protective varnish, and upon request, anti-graffiti treatment can be also applied.
