

# Mo

---

Cigarette bin 120×120 mm square section made of 6 mm-thick and 1000 mm-high powder coated steel plate with a 250×250 mm base plate. The central part is closed by two 2 mm-thick stainless steel shaped plates that due to the sloping ends, enable you to put out and introduce cigarettes in the lower part. Inside this there is a circular container that can be extracted through a special front panel with a triangular key lock. It is fixed to the ground with special steel wall plugs (not included). Available in both hot galvanized steel and polyester powder coated and weathering steel with sandblasting and oxidation cycle developed by Metalco. All screws are stainless steel

---

**Variant code:** 0025404

---

**Size and weight:** Width 250mm  
Length 250mm  
Height 1000mm  
Weight 17kg  
Capacity 1.2lt

---

**Materials:** Polyester powder coated steel

---

**Finishes:** Polyester powder coated steel in wrinkled finish

Brushed stainless steel

Color:  
to be chosen from Metalco standard colour range

---

**Fixing:** Pre-drilled for anchors

Technical drawing:

Ground fixings

## POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

### RAL

### SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.

## STAINLESS STEEL

---

For our stainless steel products and components, we normally use AISI 304 or 304L stainless steel, but in case of installation in highly aggressive conditions we recommend requesting AISI 316 stainless steel.

Our stainless steel is usually brushed or shotblasted, depending on the technical features of the product.

Electropolishing treatment is also available, upon request.
