

Spencer C 120

Polyester powder-coated sendzimir steel waste bin, consisting of a cylindrical sheet metal container with a hinged lid made of pressed sheet metal, featuring a central waste disposal hole and a snap-lock closure. The lid can be supplied, upon request, complete with an ashtray with a stainless steel anti-theft cable. Inside, there is a galvanized steel ring for securing a waste bag. The bin rests on a stainless steel base, designed for eventual ground anchoring.

Variant code: 0023054

Size and weight: Height 880mm
Weight 29kg
Diameter 435mm
Capacity 120lt

Materials: Structure: Steel treated with protective coating and powder coating

Lid: Steel treated with protective coating and powder coating

Base: stainless steel

Bag holder: Steel treated with protective coating

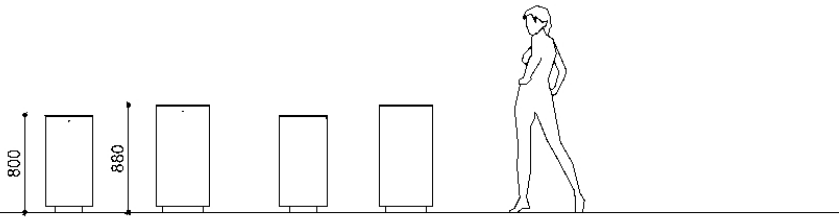

Finishes: Polyester powder coated steel in wrinkled finish

Color: to be chosen from Metalco standard colour range

Fixing: Pre-drilled for anchors

Accessories: Base inox D=370 (basamento da interni), Targa in inox satinato 110x110 con pittogramma, Targa liscia in inox satinato 110x110, Posacenere verniciato, Contenitore interno 120 lt.

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

RAL

SABLÈ

The mentioned RAL and SABLÈ colours should be considered only illustrative.
