

# Foglia L

Shading roof composed of load-bearing columns equipped with base plate and designed to accommodate a lighting system. The roof is composed of a steel tube frame covered below by steel sheet and on the top by an insulated panel and protected by a waterproof sheath applied on site. The appropriate slope of the roof ensures the water runs inside one of the load-bearing columns.

---

**Variant code:** 0103964

---

**Size and weight:** Width 7676mm  
Length 4276mm  
Height under roof 3300mm

---

**Materials:** Steel treated with protective coating and powder coating

---

**Finishes:** Polyester powder coated steel in wrinkled finish

Color:  
to be chosen from Metalco standard colour range

---

**Fixing:** Pre-drilled for anchors

Technical drawing:

# POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

## RAL

## SABLÈ
