

# Pensilis 1722

---

Shelter composed of load-bearing columns in steel profile and a monolithic frame, made of steel tube and profiles, that supports a roof made of tempered and coupled glass sheets, decorated with serigraphy. The back walls are made of coupled glass. The shelter is equipped with two side walls, one in coupled glass and the other equipped with an advertising board made of aluminum profiles with integrated lighting system. The shelter is complete with toponym and it is provided with Sedis bench in varnished Okumè wood, fixed to the lower current of the supporting structure. The glass sheets can be equipped with holes for the installation of an additional display board.

**Variant code:** 0103814

---

**Size and weight:** Width 1722mm  
Length 4292mm  
Height 2383mm  
Wheelbase 4059mm

---

**Materials:** Steel treated with protective coating and powder coating  
+  
Glass  
+  
Okumè wood

---

**Finishes:** Polyester powder coated steel in wrinkled finish  
+  
Water-based varnished Okumè wood

Color:  
Steel: to be chosen from Metalco standard colour range

Glass: NO

Okumè: NO

Finishes:

---

**Fixing:** Anchor plates

# POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

## RAL

## SABLÈ

metalco.it  
info@metalco.it

The mentioned RAL and SABLÈ colours should be considered only illustrative.

## WOOD

We use different types of wood for our products, including hardwood, thermotreated pine wood\* or Okumè wood.

The hardwood is provided with a water-based pigmented impregnation treatment.

Upon request, hardwood can be left natural/untreated.

Pine wood\* undergoes heat treatment, which allows to obtain a material with a longer life cycle, greater resistance to weathering and decay, greater solidity and dimensional stability.

On request, it can be supplied with a water-based pigmented impregnation treatment.

Okumè wood products are always supplied with a water-based varnish.

Thermotreated pine and hardwood can be supplied with FSC certificate on request.

\*Thermo-treated pine wood has knots of varying sizes.
