

Terminal

Waste basket for separate waste collection made of two semi-housings and a base in stainless steel sheet. The lid is made of stainless steel sheet with corners protected by special parts in PP plastic. The snap lock, with a triangular key, also features a centering mechanism to hold the lid in position. The basket is equipped with 4 openings for introducing separated waste, along with conveyor sections made of pressed and bent sheet metal, and internal containers made of sheet metal, external plastic handles for handling, and feet for stable support on the ground. Upon request, the conveyors can be supplied with customized graphics. For indoor use only.
