

Air Lap C

Round table with integrated seat, consisting of a supporting structure in 15 mm thick steel plate and special tube connections (D=60 mm for the seat and D=80 mm for the table) that rests on a frame in 50x20 mm tubular steel. The seat is made of curved tubes D=16x1.5mm while the table top is composed of a tubular steel frame 40x20x2 and 3mm thick steel sheet on which rests a 12mm thick sintered stone slab.

Variant code: mtav00016asa

Size and weight: Width 2360mm
Length 2360mm
Height 755mm
Weight 180kg
Seat Height 450mm

Materials: Steel treated with protective coating and powder coating
+
Sintered Stone

Finishes: Polyester powder coated steel in wrinkled finish

Color:
to be chosen from Metalco standard colour range

Finishes:

Fixing: Pre-drilled with D=12mm holes for fixing to the ground with mechanical anchors (not included).

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

SINTERED STONE

Sintered stone is an ultra-compact, carbon-neutral material produced through an industrial manufacturing process.

It is composed of a mixture of selected atomized natural minerals (feldspars, mineral oxides, clay, silicon, and many others), without any chemical additives resins, or adhesives.

These are compacted through industrial processes that enhance the physical and mechanical properties of natural stone, providing the highest performance.
