

Ecomix

Truncated pyramid-shaped basket in stainless steel sheet with polyester powder-coated cast aluminium lid. The basket is equipped with a galvanized steel and polyester powder-coated ashtray with stainless steel anti-theft cable and a galvanized steel round bag holder ring, fixed by interlocking on the internal perimeter.

Variant code: 0021940

Size and weight: Width 755mm
Length 755mm
Weight 50kg
Capacity 200lt
Seat Height 990mm

Materials: Structure: stainless steel

Lid support: Steel treated with protective coating and powder coating

Lid: painted cast aluminum

Bag holder: Steel treated with protective coating

Finishes: Brushed stainless steel

Cast aluminum painted in smooth finish

Color:
upon choice from Metalco standard colours range

Finishes:

Fixing: Pre-drilled for anchors

Technical drawing:

Ground fixings

POWDER COATED STEEL - POWDER COATED ALUMINUM

For every steel product and component, we choose the most suitable raw materials and treatments based on our production cycle and the needs of each design.

Our steel treatments include hot-dip galvanization, cold galvanizing, Sendzimir galvanization, cataphoresis and primer coating.

For our aluminum products and components, we use aluminum in sheet or in extrusion or in casting.

Then we powder coat steel, stainless steel, and aluminum with polyester powder, in accordance with EN ISO 12944-2.

We offer a wide range of standard RAL colors with wrinkled finish with different levels of texture. Only when customization through stickers, pad printing or serigraphy is provided, for technical reasons, their finish will be smooth matte or smooth glossy, depending on the technical feasibility.

We also offer the exclusive SABLÈ' colours, with a peculiar metallic wrinkled texture.

Upon request, different treatments and customizations are available, such as powder coating with non-standard RAL colors, and/or with smooth matte and smooth glossy finishes, and/or anti-graffiti treatment.

If required, the powder coating process can be certified Quality Steel.

The mentioned RAL and SABLÈ colours should be considered only illustrative.

STAINLESS STEEL

For our stainless steel products and components, we normally use AISI 304 or 304L stainless steel, but in case of installation in highly aggressive conditions we recommend requesting AISI 316 stainless steel.

Our stainless steel is usually brushed or shotblasted, depending on the technical features of the product.

Electropolishing treatment is also available, upon request.

BRUSHED

SHOTBLASTED
